### **Will your insurance pay for a Midwife, birth center or home birth?**

- **\$25** Verification of Benefits (VOB)
  - Get a clear view of your benefits and how they apply to the birth of your choice.
  - **Can help you decide if it's worth billing insurance. You won't have to pay for billing without knowing if your care is covered.**
  - **I speak with a representative for a deep dive into your coverage based on your personal birth plan, then communicate the details to you in a way that you can understand how it will apply to your care.**
  - Includes applications for GAP exceptions or Prior Authorizations
  - If you decide to have me do your billing, this \$25 will apply to your Insurance Billing fee.
  
- **\$150** Insurance Billing (\$125 if you paid for a VOB)
  - **Includes billing for pregnant person, newborn and birth center if applicable.**
  - Covers medical coding for your bill if your midwife requests it.
  - Includes denial management - if you get a denial we will figure out why and see if there's anything that can be done to fix it or appeal it.
  
- **Free** Support for doing your own Verification of Benefits
  - Do you feel up to calling your insurance yourself and asking all the questions? **Contact me for a free step by step guide on talking to your insurance about a home birth or birth center delivery.** I'll email you the guide and a form to keep track of all the most important information to remember while talking to your insurance. I will be available for any questions you might have while you complete your own Verification.

Knowing if you can bill your insurance for the midwife and birth place you have chosen is an important first step. Give me a call, text or email anytime, and we can figure out if your insurance will pay for what you want!
